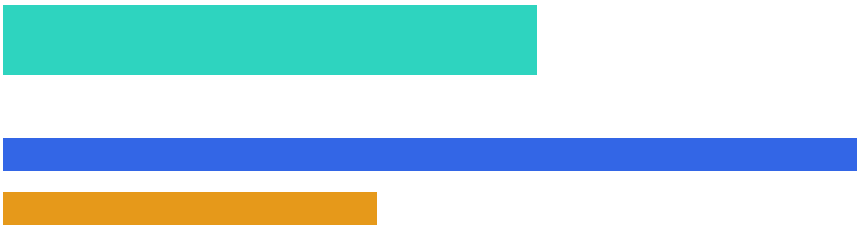
Cortex IDE

Built-in PDF renderer self-test



Page 1 of 3 - the vector bars above are drawn by the renderer.

Shapes prove the canvas path works, not just text extraction.

Benchmark results

Search latency p50: 46 ms p95: 48 ms budget: 50 ms

Recall@10: 0.982 Index: 1,000,000 vectors x 512 dims

How to verify

1. Open demo/sample.pdf in the editor.
2. Use the arrows in the toolbar to change pages.
3. The strip under the canvas shows the extracted text.
4. Broken or encrypted files say so instead of showing blank.
